

Architectural Glass  
& Metal Technician  
CERTIFICATION PROGRAM

## AGMCC Fall 2019 News

### Architectural Glass and Metal Certification Council

---

Both the NACC and AGMT certification programs continue to be strong.

To date, we have 25 NACC certified glazing contractors. An additional 5 companies are currently undergoing evaluation. And 15 more are in the application process. Not yet certified? Read on to find out how and why certification can benefit your company.

There are now 204 AGMT certified glaziers. More tests have been scheduled for the remainder of 2019. Watch our websites for details.

## Featured Case Study

### The Magic of Certification

by Amanda Weko | [AGW Communications](#)

Specifications consulting firm, Conspectus, Inc. Owner David Stutzman, AIA, FCSI, CCS, SCIP, shares his perspective on the benefits of NACC certification to glazing contractors and the design and construction community.

"NACC adds a consistency measure across the industry."

North American Contractor Certification

**THE MAGIC OF CERTIFICATION**  
SOLVING THE QUALIFICATIONS DILEMMA

"Adding NACC certified to the spec simplifies the process. You know what you're going to get. If you don't have that certification to specify, then each specifier is on his own to set qualifications independently. NACC adds a consistency measure across the industry."  
- David Stutzman, AIA, FCSI, CCS, SCIP  
Conspectus, Inc.

Owner

**About Conspectus, Inc.**  
The nation's largest independent specifications consulting firm, Conspectus consistently goes beyond expectations to mitigate risk and add value for construction project stakeholders. Since 1992, the company has provided specifications and consulting emphasizing comprehensive documentation, transparency, and collaboration so that stakeholders can actively contribute to sound decision-making and project success. Conspectus thinks beyond the specifier's traditional role and adds an interdisciplinary perspective to focus on the right priorities. For more information, visit <https://conspectusinc.com>.

**Introduction**  
A standout high school drafter, David Stutzman followed the career path that seemed most logical - he became an architect. Upon graduation, he joined with a project manager to retrofit Army buildings for energy efficiency. After measuring and documenting 65 buildings, Stutzman thought he was finished. Then his boss asked him to write the specifications. "I literally said, 'what's a spec?'," he recalled. Once he got the hang of it, Stutzman realized the value and importance of a well-written and detailed specification. Shortly thereafter, he transitioned to spec writing full-time. In the four decades since, he has served as a project architect, estimator, and consultant, always with a focus on specs. In 1992, he founded Conspectus to serve owners, architects, design-builders, and construction managers. Driven by multi-disciplinary perspectives, Stutzman and Conspectus remain at the forefront of the industry. When the NACC program was established, they quickly became vocal advocates.

**About NACC**  
The North American Contractor Certification Program provides architectural glass and metal contractors with certification recognition through a professionally administered, third-party assessment, as a means of creating a baseline for competency and adherence to industry-accepted guidelines.
